## KC Glass & Material had 2018 outing

---

Last May, KC Glass & Material had outings for three times to Danyang. They had spent valuable time to cherish beauty of Danyang Palgyeong beyond the area of Cheonan. Even if it is a one day outing, and there were raining in the 2<sup>nd</sup> and 3<sup>rd</sup> outings, people kept bright smiling and cheerful mind having a wonderful time. The awesome scenes from Oksunbong Peak, panorama of Cheongpung Lake and beautiful landscape around Namhan River when they returned from Danyang Jandi way enabled us to heal our tired mind and body and enabled us to understand each other through harmony and reconciliation. After a short outing, we return to busy life, but we remember Sainam Temple where we felt beauty and emotion from nature, scenery of Dodansangbong Peak, climbing to Oksunbong Peak, and Danyang Jando way tracking for a long time. It is hoped that the valuable tie and memory from KC Glass & Material keep eternally.

## KC EnviroServices participated in IFAT

From May 15 ~ 20, KC EnviroServices attended IFAT Environmental Expo held in Munich, Germany. It is a biannual international environmental technology and facility expo and this visit aimed to view excellent environmental facilities and technologies in Germany and Europe, to figure out market trend so that KC may develop understanding of environmental industry.

With Seokgu Lee, executive director of KC EnviroServices, officers of each business division, operation, engineering and safety environmental team heads participated in the expo accompanied by Yongyi Jo, senior officer and, Giyoung Eom, staff of strategic management team of KC Green Holdings.

In this IFAT, they examined companies with excellent technical capacity and had business meetings with them in order to find out possibility to enlarge capacity in the environmental industry by KC Network. And, they had coordinated the business trip schedule with a local German company that has a business relation with KC EnviroServices and they had a meeting with IFAT company and visit the incineration company and waste water treatment plant in Frankfurt and Coblenz respectively. This visit enabled the employees of KC EnviroServices to enlarge overall perspectives on the environmental market and was a good opportunity to reinforce business networks with customers. (The end).

## KC Cottrell visited by the ambassador of the RSA

---

On May 16, the embassy of the RSA (Republic of South Africa) in Korea visited the head office of KC Cottrell.

From the embassy, Nozuko Gloria Bam, the ambassador, Harold Manamela, economic officer and Gwangsu Jin, officer attended. From KC Cottrell, Dongyoung Seo, president, Kihwan Lee, executive director, Taejun Lee, managing director and Bongeung Park, managing director attended in the interview.

This meeting was initiated by the introduction of overall company information and main business of KC Cottrell followed by a presentation on Ngodwana 25MW Biomass Power Plant by Taejun Lee. The ambassador and economic officer showed their interest in the positive impact of the project on the local economy in the RSA and the ambassador promised to make available support to KC Cottrell in the course of the project. (The end).

# 4. KC Green Materials entered product development agreement

Samcheok Eco Dry Material (commissioned operation of KC Green Materials, CEO Kisuh Park) announced on the 1<sup>st</sup> that they exchanged MOU for the product development with Korea Southern Power and With Emtech by using

Recycling fly ashes from Samcheok Power in the Korea Southern Power with the use of artificial aggregates.

Samcheok Eco Dry Material began to produce sand for dry material and mixture from 2018 by recycling fly ashes from Samcheok Power in the Korea Southern Power, and they exchanged MOU for the product development with Asia Cement, Korea Southern Power and With Emtech by using recycling fly ashes from Samcheok Power in the Korea Southern Power.

Artificial aggregates produced from Samcheok Eco Dry Material is an eco-friendly aggregate produced by physical and chemical combination through hydration react using CaO, a fly ash, which expects innovative development in terms of recycling wastes and resource recirculation. By means of research on the product application and facility improvement, it will be applied to mortar products and cement products of Asia Cement from 2019 onwards..

(May 31, Talwoo Lee, the honorary chairman of KC Cottrell, visited KC Green Materials)

Meanwhile, on May 31, Talwoo Lee, the honorary chairman of KC Cottrell, visited KC Green Materials, discussed the further development direction with Kisuh Park, CEO, and greeted and encouraged employees of KC Green Materials (The end).
